

# — MODEL — 650-33

# **Excess Pressure Safety Shut-Off Valve**

- Automatic Operation Adds Safety to Pressure Reducing Valve (PRV) Rigs
- Easy Adjustment and Maintenance
- Optional BMS Fail Signal
- Manual Reset Feature

The Cla-Val 650-33 Excess Pressure Safety Shut-Off Valve (XPSV) automatically protects the downstream distribution piping and fixtures or municipal systems from experiencing excess unsafe pressures in the event that outlet pressure of the high flow PRV rises above an acceptable level. Typically, the XPSV is set 10-15 psi higher than the PRV setpoint.

In operation, when the PRV discharge pressure is as set, the XPSV is fully open. When the PRV outlet pressure rises above normal, the XPSV will begin close to isolate the excess pressure from the downstream piping. Operation is completely automatic and may be easily field adjusted.

For full port valve applications, use Cla-Val Model 50-33.

#### **Schematic Diagram**

#### **Item Description**

- 1 Hytrol 100-20 Main Valve Reverse Flow
- 2 CRL/CRL-60 Pressure Relief Control
- 3 X58A Restriction Assembly
- 4 X46A Flow Clean Strainer
- 5 CK2 Manual Reset Control
- 6 X101 Valve Position Indicator

#### **Optional Features**

Item Description

B CK2 Isolation Valve

#### **Application Overview**

Water systems that serve critical fixtures and require uninterrupted water service should be designed with the added security of the Excess Pressure Safety Shut-Off Valve. Careful review of the system flow requirements, and need for PRV redundancy, should be considered when determining the optimum PRV Station design. When seeking the highest reliability for the PRV Station, careful consideration of the valve construction materials is important.

A Fail Switch Option provides contact closure for remote (BMS) indication of an event that requires operator attention. If the PRV Station is located in an area where an adequate drain is not available, a Dry Drain option should be considered. The hydraulic conditions must be taken into account when specifying the Model 650-33 Excess Pressure Safety Shut-Off Valve.

# Typical Application 90 Series Pressure Reducing Valve 90 Series Pressure Safety Shut-Off Valve Pressure Gauge To drain

#### **Application Details**

- · Discharge to atmosphere or to contractor supplied drain piping
- · Redundant design with parallel installation is suggested for commercial applications where uninterrupted service is required
- For larger sizes, please consult the factory at 800.942.6326 or info@cla-val.com

#### Model 650-33 (Uses Main Valve Model 100-20)

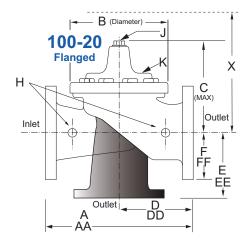

#### Pressure Ratings (Recommended Maximum Pressure - psi)

Valve Body &	Pressure Class					
valve body &	Fla	anged	Grooved	Threaded		
Grade	Material	ANSI Standards*	150 Class	300 Class	300 Class	End‡ Details
ASTM A536	Ductile Iron	B16.42	250	400	400	400
ASTM A216-WCB	Cast Steel	B16.5	285	400	400	400
UNS 87850	Bronze	B16.24	225	400	400	400

Note: \* ANSI standards are for flange dimensions only. Flanged valves are available faced but not drilled.

‡ End Details machined to ANSI B2.1 specifications.

Valves for higher pressure are available; consult factory for details

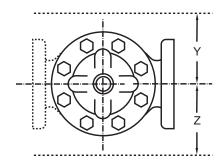

#### **Materials**

Component	Standa	ations			
Body & Cover	Ductile Iron	Cast Steel	Bronze		
Available Sizes	80 - 250mm	80 - 250mm	80 - 250mm		
Disc Retainer & Diaphragm Washer	Cast Iron	Cast Steel	Bronze		
Trim: Disc Guide, Seat & Cover Bearing	Bronze is Standard Stainless Steel is Optional				
Disc	Buna-N® Rubber				
Diaphragm	Nylon Reinforced Buna-N® Rubber				
Stem, Nut & Spring	Stainless Steel				

For material options not listed, consult factory.

Cla-Val manufactures valves in more than 50 different alloys.

#### Model 650-33 Dimensions (in mm)

Valve Size (mm)	80	100	150	200	250

Suggested Flow (gpm)	Maximum	55	93	125	210	300	460	800	1800	3100
Suggested Flow (Liters/Sec)	Maximum	3.5	6	8	13	19	29	50	113	195

#### **Notes**

**Reduced Port Valves:** 

• 100-20 Pattern: Globe, Angle

#### **End Connections:**

\* Flanged • Threaded • Grooved (Globe only)

#### Pressure Classes:

· 150 and 300

### **Pilot System Specifications**

#### **Adjustment Ranges**

0 to 75 psi Max. 20 to105 psi 20 to200 psi \* 100to300 psi

\*Supplied unless otherwise specified.
Other ranges available, consult factory.

#### **Temperature Range**

Water: to 180°F

#### **Materials**

Standard Pilot System Materials
Pilot Control: Low Lead Bronze
Trim: Stainless Steel Type 303
Rubber:Buna-N® Synthetic Rubber

Tubing & Fitting: Copper and Bronze

Optional Pilot System Materials Pilot Systems are available with optional Aluminum, Stainless Steel or Monel materials.

## **Pilot Control Operation**

**CRL Pilot** 

The Model CRL is normally held closed by the force of the compression spring above the diaphragm. Control pressure is applied under the diaphragm. When the controlling pressure exceeds the spring setting, the disc is lifted off its seat, permitting flow through the control. When control pressure drops below the spring setting, the spring forces the control back to its normally closed position. The controlling pressure is applied to the chamber beneath the diaphragm through a sensing port on the CRL Pilot Control.

**CRL-60 Pilot** 

The CRL-60 is normally held closed by the force of the compression spring above the diaphragm. Control pressure is applied under the diaphragm. When the controlling pressure exceeds the spring setting, the disc is lifted off its seat, permitting flow through the control. When control pressure drops below the spring setting, the spring forces the control back to its normally closed position. The controlling pressure is applied to the chamber beneath the diaphragm through a sensing port on the CRL-60 Pilot Control.

# **Model 650-33 Purchase Specification Summary\***

#### INTRODUCTION

This specification covers the design, manufacture, and testing of 1 in. (25 mm) through 8 in. (200 mm) Control Valves

#### **GENERAL**

- 1. Standard products use the same manufacturer for multiple units of same type.
- 2. "Tying" of equipment into packages for the purpose of thwarting competition shall be considered to be in non-compliance with these specifications.
- 3. Manufacturers shall price items under different subsections or sections separately.

#### **EXCESS PRESSURE SAFETY SHUT-OFF CONTROL VALVE FUNCTION**

The Excess Pressure Safety Shut-Off Valve shall automatically protect critical downstream distribution piping, fixtures or municipal systems from experiencing excess and unsafe pressures; in the event that outlet pressure of the high flowing Pressure Reducing Control Valve rises above an acceptable level. The Excess Pressure Safety Shut-Off Valve shall be installed downstream from and is typically set 10-15 psi higher than the set point of the Pressure Reducing Control Valve. When the Pressure Reducing Control Valve discharge pressure is maintaining its set point, the Excess Pressure Safety Shut-Off Valve shall remain fully open. When the Pressure Reducing Control Valve outlet pressure rises above normal, the Excess Pressure Safety Shut-Off Valve will begin closing to isolate the excess pressure from the downstream piping. Excess Pressure Safety Shut-Off Valve shall be easily field adjusted.

Please visit www.cla-val.com for the complete 650-33 Purchase Specification.

Component	Material	Options				
Body & Cover	Ductile Iron-ASTM A536	Cast Steel or Bronze				
Main Valve Trim	Stainless Steel	Other Materials Available				
Seat	Stainless Steel	Other Materials Available				
Stem, Nut & Spring	Stainless Steel					
Seal Disc	Buna-N <sup>®</sup> Rubber					
Diaphragm	Nylon Reinforced Buna-N <sup>®</sup> Rubber	Other Materials Available				
Internal Trim Parts	Stainless Steel • Bronze • Brass					
	Flanged (1-1/2" - 36")					
End Detail	Threaded (1" - 3")					
	Grooved (1-1/2" - 8")					
Pressure Rating	Class 150 lb. (250 psi Max) • Class 300 lb. (400 psi Max)					
Temperature Range	Water to 180° F					
Any other wetted metallic parts	Stainless Steel • Bronze • Brass					
Coating	NSF/ANSI 61 Fusion Bonded Epoxy (Interior and Exterior)					
Optional Accessories	Position Indicator; Limit Switch; Opening & Closing Speed Controls; Check Feature; Isolation Valves; Gauges; Anti-Cavitation Trim, etc.					

#### When Ordering, Please Specify:

1. Catalog No. 50-33

2. Valve Size

3. Pattern - Globe or Angle

4. Pressure Class

5. Threaded or Flanged

6. Trim Material

7. Adjustment Range

8. Desired Options

9. When Vertically Installed
