

Level switches Series LC40

Float level switch for liquids

- Simple and robust construction
- Versatile and easily adaptable to the different control positions of the industrial processes
- Side or top of the tank mounting
- Watertight and safe installation
- Excellent chemical resistance
- Design for high pressure and temperature available
- Connections: EN 1092-1 DN65 flange. Other sizes and flange standards (ASME B16.5, JIS,...) on request
- Materials: EN 1.4404 (AISI 316L), PVC, PP, PVDF, PTFE
- Level detection
- Options:
 - ATEX Ex d IIC T6 version
 - Extended temperature range version
 - Accessories for extended switching differential
 - Chamber for external mounting

Working principle

Float level switches. When a liquid reaches the level where the level switch is positioned, its float follows the level variations in a such way that the articulated rod is moved. A magnet placed in the opposite side of this rod activates a switch.

This switch can be either a micro-switch, a reed switch, an inductive detector or a pneumatic switch, depending on the application requirements.

Applications

- Pumps start-stop
- Control of industrial processes
- Dosing and process tanks
- Tanks in machinery for chemical industry
- Level detection in tanks for food and textile industries,...
- Level control in tanks of steam condensates

Models

- LC40 side mounting
- LC40-BA side mounting
- LC40-V top mounting
- LC40-VR top mounting

Technical data

- **Switching differential:** 52 mm
Up to 1100 mm, depending on the accessories
- **Liquid density:** 0.45 ... 3 kg/l
- **Liquid maximum viscosity:** 3000 mPa·s
- **Liquid temperature:**
 - LC40 / AISI 316L: -50°C ... +150°C
-50°C ... +300°C on request
 - LC40 / PVC: 0°C ... +50°C
 - LC40 / PP: -20°C ... +90°C
 - LC40 / PTFE: -20°C ... +150°C
 - LC40 / PVDF: -20°C ... +150°C
- **Ambient temperature:** -30°C ... +80°C

• Working pressure:

- AISI 316L: PN16
Others on request
- PP, PVC, PTFE: PN10

• Connections:

- EN 1092-1 DN65 flange
- Other sizes and flange standards on request
- Special square flange 92 x 92 / 108 x 108 mm

• Mounting:

- side of the tank. On top with special models

• Housing:

- IP66/IP67 - anodized aluminium.

EN 1.4404 (AISI 316L), PP, PVC, PTFE on request

• Accessory A21 for extended switching differential

• Chamber for external mounting

Limit switches

- **AMM:** SPDT micro-switch
- **AMD:** inductive detector
- **AMR:** SPDT reed switch
- **AMP:** ON/OFF two-way pneumatic switch

All switches can be supplied in ATEX Ex d IIC T6 version on request

Housing

Standard anodized aluminium IP66 / IP67.

Other materials on request: EN 1.4404 (AISI 316L), PP, PVC,...

ATEX version

ATEX Ex d IIC T6 certified.

Suitable for temperatures up to 300°C.

Ex d IIC T6 housing with ATEX packing gland

Square flange
