A COMPANY OF THE ARI-GROUP

Features:

- Carbon steel / stainless steel body
- Double offset construction:
Rotary movement (90°) without wear or friction
- Metallic or PTFE sealing
- Bi-directional tightness
- Replaceable seat ring

Double flanged high performance valve (High temperature steel, Stainless steel)

Figure	Nominal pressure	Material	Nominal diameter	Sealing element
84.122	PN10 - PN25	1.0425 / 1.0565	DN 200-700	PTFE+C (TS)
			DN 200-1200	Stainless steel (CS)
54.122	PN10 - PN25	1.4307	DN 200-700	PTFE+C (TS)
			DN 200-1200	Stainless steel (CS)

Face-to-face dimension series 14 acc. to EN 558-1

Flange acc. to ANSI 150 possible

Sealing element:	
• PTFE+C (TS) ¹⁾	-40°C to 180°C
• Stainless steel (CS)	-40°C to 260°C
¹⁾ Observe operating limits with sealing PTFE+C, refer to page 3	
Max. differential pressure:	
84.122	• 16 bar - standard
54.122	• 25 bar - option

Actuation arrangement:	
• Worm gear • Electric actuator	• Pneumatic actuator • Hydraulic actuator
Sealing leakage test:	
PTFE+C	• DIN EN 12266-1 Leakage rate A
Stainless steel	• DIN EN 12266-1 Leakage rate B - standard • DIN EN 12266-1 Leakage rate A - option

Options on request

²⁾ Only for CS-version

Information / restriction of technical rules need to be observed!

The engineer, designing a system or a plant, is responsible for the selection of the correct valve.

Resistance and suitability must be verified (contact manufacturer for information, refer to Product overview).

TS = Teflon seal and **S**tainless steel disc

CS = **C**hromed seating and **S**tainless steel disc

myValve® - Your Valve Sizing-Program.

myValve® is a powerful software tool that not only helps you size your system components; it also gives you instant access to all other data about the selected product, such as order information, spare parts drawings, operating instructions, data sheets, etc., whenever you need it.

Contents:

Module ARI-high performance valve ZEDOX-calculation

- Sizing of flow quantity Kv, volume flow Q, pressure drop p, sound level; Selecting the valve size with given capacity; Selection of the actuator.
- Calculation of torque for actuators in flow from shaft side and flow from disc side.

Media:

Integrated media-data bank (more than 160 media) with conditions:

- Vapours / gases
- Steam (saturated and superheated)
- Liquids

Special features:

- Project administration of the calculation and product data incl. spare part drawings concerning to project and tag number.
- Direct output or calculation and product data in PDF format.
- Product data could be taken for a direct order.
- SI- and ANSI-units with direct conversion to another data bank.
- Settings with over pressure or absolute pressure.
- All ARI valves are integrated in a data bank.
- Direct access concerning to the product on data sheets, operating instructions, pressure-temperature-diagram and spare part drawings
- Operation in company networks possible (no complex installations on individually PC's necessary).
- Extensive catalogue extending over several product groups.

System Requirements:

Windows operating systems, Linux, etc.
